Research Profile

I am a Master's student in Control Science and Engineering at Henan University, advised by Prof. Xiuli Chai. My research focuses on image representation and multimedia security. I am particularly interested in orthogonal moments, transform-domain representations, and robust reversible watermarking, with an emphasis on principled representations that remain stable under real-world signal processing and geometric distortions.

Research interests: Image Representation, Multimedia Security, Orthogonal Moments, Robust Reversible Watermarking

Education

Henan University

M.Eng. Candidate in Control Science and Engineering
Advisor: Prof. Xiuli Chai · Expected graduation: June 2027

2024 - 2027

GPA: 4.15 / 4.7

Publications

[1] Attack-Aware Metric Learning With Polar Harmonic Fourier Moments for Robust Reversible Color Image Watermarking

Wenhui Li, Xiuli Chai, et al.

IEEE Transactions on Image Processing · 2026 · Under Review

[2] Maximum-Entropy Polar Harmonic Transforms for Information-Density-Driven Image Representation

Xiuli Chai, Wenhui Li, et al.

Pattern Recognition · 2026 · Accepted

[3] Robust Reversible Image Watermarking Based on the Zeros Distribution of Orthogonal Moments

Xiuli Chai, Wenhui Li, et al.

Signal Processing · 2026 · Accepted

Honors

Provincial First Prize - Huawei ICT Competition · Team Competition (2025)

Provincial Second Prize - Huawei ICT Competition · Individual Competition (2024)

Academic Service

Head, Academic Department, Graduate Student Union · Henan University (2025 - Present)

Organizing academic forums, invited lectures, and graduate research activities.
